Prof.**

Contents

1. Title (All Times new roman- 28)
2. Introduction
3. Literature review
4. Problem Statement
5. Objectives
6. Methodology
7. Time line
8. Excepted Outcomes
9. References

Title of the project

Instructions : Use font size 20 of Times new roman for other contents

Slide May contain only

1. Readable Diagrams/figures/charts with proper titles
2. 3 to 5 topic headers with bulleted points per slide
3. No long sentences and paragraphs
4. Follow line spacing of 1.5 between two consecutive lines

Introduction

Literature review

Refer below table as example

AUTHOR	WORK	FINDINGS	REMARKS
Narayanasamy et al (2007)	Suitability of Interstitial Free(IF) steels for press forming operations analyzed.	Tensile properties (tensometer), formability(press) parameters correlated with FLD. Formability is good.	Sheets of different widths-thickness 0.6mm, 0.9mm, 1.2mm and 1.6mm- Sheet of 1.6mm is superior.
Velmanirajan et al (2012)	Numerical modeling of Al sheets formability using Response Surface Method(RSM).	Mathematical model tool to predict response – annealing temp, orientation or width, thickness-empirical relations evolved.	Al1350, Al8011, Al1145 1.2mm,1.5mm,1.8mm- Model predicted in agreement with experiments.
Jianguang et al (2013)	FLD prediction of sandwich sheets.	Numerical simulation-GTN damage model-punch dome test-FLD-Validated. Core thickness influence studied.	AA5052/polyethylene/AA5052. Formability better than monolithic sheet.

Problem Statement

Objectives

Methodology

Time line

Refer below table format as example

Activity/Time (Week)	Activity and Time Plan															
	Jul-25				Aug-25				Sep-25				Oct-25			
	1	2	3	4	1	2	3	4	1	2	3	4	1	2	3	4
Problem Statement	■															
Rocket Engine Basics	■	■														
Literture Survey			■	■	■											
Heat Transfer Analysis for CE 20				■	■	■										
Thrust chamber design for CE 60							■	■								
Heat Transfer Analysis for CE 60									■							
Modeling of CE 60 Trust Chamber										■						
CFD Analysis of Thrust Chamber										■	■	■				
Validation and Corrections												■	■			
Results														■		
Documentation															■	■

Excepted Outcomes
